

<p style="text-align: center;">BEGINNERS COURSE FOR SEMI PROFESSIONAL CAMERA'S "Learn to use your DSLR camera other than in AUTO MODE in 12 hours"</p>
--

Timing and place:

4 Mornings over 4 weeks, from 10am till 1pm.
Seshadri Avenue plot 5 119/C, Injambakkam

What to bring:

- Digital Single-Lens Reflex camera with charged battery
- Additional lenses and other equipment you might have
- Camera manual
- Pen to take notes (I provide a syllabus)
- Lot's of good will to learn

Homework:

We will do some exercises during the course but I will also give you homework to do. This will force you to recapitulate what I explained during the course.

You bring the homework on a memory stick. We will project and discuss the homework of all students at the beginning of the following session.

Program:

Session 1: Introduction, shutter speed, aperture and ISO: theory & exercises

Session 2: homework check + Auto/P/S/A mode, where and how to focus for moving and still subjects: theory & exercises & time for questions

Session 3: homework check + composition, light source (natural light and briefly flash): theory & exercises & time for questions

Session 4: homework check + type of lens, metering system AF, exposure correction, formatting, raw versus jpeg, white balance, etc.: theory & exercises & closure
